

## Introducing Edimax iQ Setup: The quickest and easiest way to set up a wireless router

Edimax is pleased to introduce its smart and innovative router feature called iQ Setup. The smart iQ Setup is a new feature of Edimax routers that allows even the most inexperienced users to set up an Edimax router with iPhone or a computer quick and effortlessly. With iQ Setup, most of the setup process is done automatically. Little to no configuration is required on the users' part and no installation CD is necessary. Edimax routers to be implemented with iQ Setup in Q4 2011 include BR-6228nS, BR-6228nC, BR-6258n, and BR-6428nS respectively.

### iQ Setup Just **PLUG** and **SURF!**

#### Smart & Automated Router Set Up

iQ Setup is designed with smart technology that allows it to detect your Internet connection type automatically and complete most of the required configuration for you. After the appropriate cable connections are made, all you need to do is to open your iPhone or computer's web browser and iQ Setup will start detecting your Internet connection type automatically. There is no need to log in the router's configuration interface with an IP address and no installation CD is required. iQ Setup will determine

whether your connection type is dynamic IP, PPPoE, or other types, and ask for required information when necessary. iQ Setup will complete the setup process by helping you establish a secure Wi-Fi network. With Edimax iQ Setup, all the most important parts of setting up a router can be done quickly, effortlessly, and automatically.

### **iQ Setup Features**

- Smart and automated router setup
- Little to no configuration is required on the user's part
- No need to log in the router's configuration interface with an IP address
